Klima@Home

30.3060.01.IT Klima@Home Wireless-Thermo/Hygro-Monitor

3 sensors incl.

With the **Klima@Home** wireless thermometer- hygrometer you can easily monitor 4 measuring points for temperature and humidity simultaneously. See the values for the location of the device and three additional rooms (bedroom, kids room, cellar , greenroom…) or the outdoor area at a glance and you are well informed.

Indoor climate is important for health

Controlling the indoor temperature and humidity by active heating and ventilation can help to achieve a comfortable and healthy living environment and may even save you heating costs. An indoor temperature between 18°C…22°C and 40…60% relative humidity is ideally.

Connect to WeatherHub

You can connect the **Klima@Home** with the WeatherHub Smart Home System. The readings can be easily accessed **on your smartphone**, no matter where you are. The WeatherHub Smart Home System is sold separately.

- Ideal for indoor climate monitoring of different rooms
- Simple overview of the measured values by individual labeling
- Includes 3 wireless transmitters for temperature and humidity
